EU-funded program participation

EU-funded program participation

M.A.P.S. - Multisport Against Physical Sedentary

Multisport Against Physical Sedentary partnership (ITA, GER, GRE, CRO, NED, POL, TUR), according with to HEPA guidelines, aimed to **create a European multisport methodology against obesity, sedentary lifestyle and dropout among youngsters aged between 9 and 12.**

EU-funded program participation

M.A.P.S. - Multisport Against Physical Sedentary (cont.)

The project brought together a group of organizations actively engaged in sports (or in research) on issues collateral to the sports' world.

A model tested in Italy, at national level, aiming in collecting the other partners' good practices and in designing and testing at the participating countries a new shared model. It included training modules for local trainers and coaches and multisport activities for boys and girls, guided by the previously trained sports experts.

EU-funded program participation

What is M.A.P.S. - Multisport Against Physical Sedentary?

MAPS tried to find ways for promoting physical activity in all its aspects by encouraging children to practice multisport and also through passive factors like urban travel habits and urban structure.

The use of multiple disciplines in order to influence, harmoniously and completely the motricity, motivation and knowledge of the young.

In April 2017, in the framework of the 20th International Congress of Physical Education and Sport Science organized by our Association, the first Publicity Seminar was held, in which extensive reference was made on the implementation of the program so far as well as its individual results.
